

Fast-track order

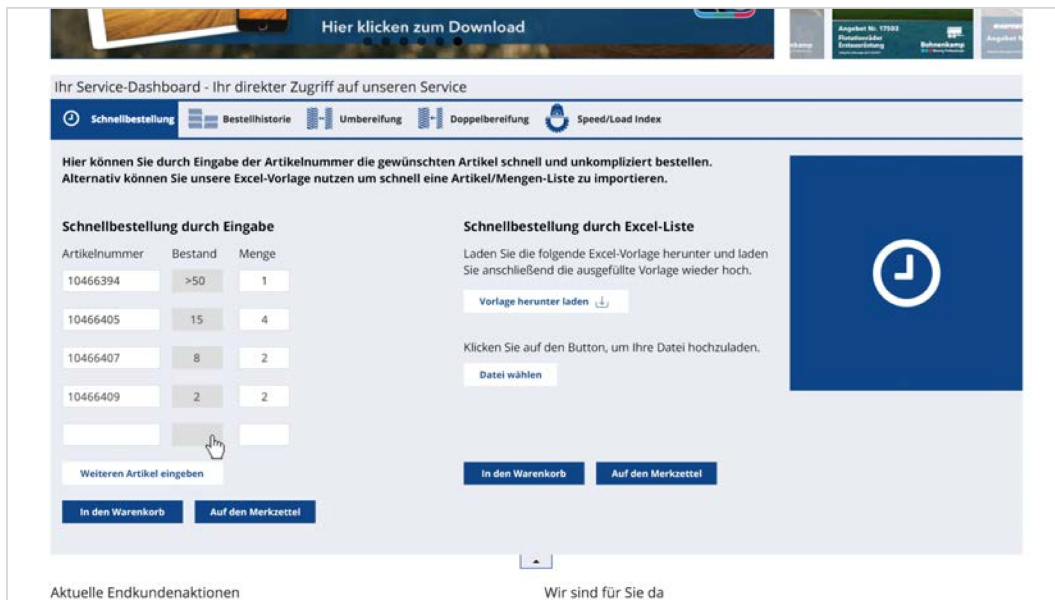

1. Do you know exactly which article you would like to order? Then you can use our fast-track order. Either click on "Service" in the main navigation and then on the "Fast-track order" tile, or click on Fast-track order on the service dashboard start page.

2. Here you can specify which products you want to order by entering the desired article number and the quantity per article.

- If you would like to order more than four articles, just click on "Add additional article". Then place the entered articles in the shopping cart or on your leaflet.

- You can also download our Excel template to enter your desired part numbers and quantities. You can then upload the Excel list at any time using the "Select file" button and then either add it to the shopping cart or to your wish list.
